NOTICE
Research Proposal Submission
PhD Admissions 2023

Candidates who have qualified the admission test are required to submit a brief research proposal of 2,000 to 3,000 words in which you clearly explain your research problem, objectives and why the research is important. A research proposal or plan helps to assess both your suitability for a research degree and whether we can offer you supervision.

The proposal should:

- have a title;
- explain the topic or question which you wish to study (clear articulation of the current understanding of the intended field and idea for potential research)
- briefly summarize existing research on the topic, citing publications as appropriate
- give a clear outline of the research you intend to do (research methodology)
- explain the intended impact of the proposed research and enthusiasm for the area of research
- have a list of references/works cited

Please note that the similarity index of your statement of purpose/research proposal should be less than 19%. Any value higher than this will automatically serve as reason for disqualification of the applicant's request for admission, at the time of interview.

The candidates, qualifying the admission test, are required to submit their Research Proposal (hard copy) to the Postgraduate Operations Office by 4th September, 2023 (4:00 pm). Additionally, the candidates are also required to send their proposals in pdf format to phd@ias.edu.pk. Please mention your name in the subject of the email.
